"The Margins of Philosophy" is an interesting work by this academically controversial author. Generally speaking--and what more can one do in a review--Derrida's readings are heavily influenced by Heidegger's statement that what an author keeps silent is as important as what he states.

First published in 1967, *Writing and Difference*, a collection of Jacques Derrida's essays written between 1959 and 1966, has

become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of Western metaphysics. The book's first half, which includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the

book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's notions of writing and différence—the untranslatable formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature, philosophy, and psychoanalysis. Writing and Difference reveals the unacknowledged program

that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida goes on to develop new ways of thinking, reading, and writing,—new ways based on the most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find *Writing and Difference* an excellent introduction to perhaps the most challenging of contemporary French thinkers—challenging because Derrida questions thought as we know it.

on improvisation, ones that richly recount experiences in the heat of the creative moment, theorize on the essence of improvisation, and offer convincing arguments for improvisation's impact across a wide range of human activity. This book is nothing like that. In a provocative and at times moving experiment, Gary Peters takes a different approach, turning the philosophy of improvisation upside-down and inside-out. Guided by Kant, Hegel, Heidegger, and especially Deleuze—and exploring a range of artists from Hendrix to Borges—Peters illuminates new fundamentals about what, as

an experience, improvisation truly is. As he shows, improvisation isn't so much a genre, idiom, style, or technique—it's a predicament we are thrown into, one we find ourselves in. The predicament, he shows, is a complex entwinement of choice and decision. The performativity of choice during improvisation may happen "in the moment," but it is already determined by an a priori mode of decision. In this way, improvisation happens both within and around the actual moment, negotiating a simultaneous past, present, and future. Examining these and other often ignored dimensions of spontaneous creativity,

Peters proposes a consistently challenging and rigorously argued new perspective on improvisation across an extraordinary range of disciplines.

An advocate of the rhetorical approach to the study of language criticizes Husserl's theories based on the logical approach

" I have but one language?yet that language is not mine." This book intertwines theoretical reflection with historical and cultural particularity to enunciate, then analyze this conundrum in terms of the distinguished author's own relationship to the French language. Its argument touches on several issues relevant to the current debates on multiculturalism.
