This book features scores, mixed audio tracks, and component audio files for 41 contemporary grooves, which may be used with the creation of music on the computer. Includes genres such as Afro-Caribbean, Afro-Cuban, Brazilian, rock, funk, soul, hip hop and jazz. The book also includes discussion of each style and groove.

A complete music appreciation course in one. 120-page, reproducible book/CD package. For each of the 22 featured composers there is a bio (focusing on his or her personal life), a portrait, a listing of the types of music he or she composed, composer factoids, and a timeline. The CD contains a listening example for each composer. The reproducible listening guide includes information about each listening example and a second by second what to listen for in the music. Also included are reviews (assessments) for each composer, plus more than two dozen pages of supplementary material. And it's all reproducible! Composers: Bach, Beethoven, Brahms, Copland, Debussy, Dvorák, Elgar, Handel, Haydn, Hensel, Hildegard, Ives, Joplin, Felix and Fanny Mendelssohn, Mozart, Schubert, Sousa, Stravinsky, Tchaikovsky, Verdi, Vivaldi, and Wagner. Reproducible PDFs included on the Enhanced CD, or purchase the Digital Download option to get a full PDF immediately. Great activities for remote teaching or distance learning!

Provides a detailed overview of the best business schools across North America, including information on each school's academic program, competitiveness, financial aid, admissions requirements, and social scenes.

The new experimental tools and approaches of modern biology have allowed us to better understand many fundamental properties of the eukaryotic cells. These significant discoveries have drastically changed the diagnostic and therapeutic approaches of modern clinical practice. On April 18-22, 1988, an International Symposium on Cell Function and Disease was held in Monterrey, Nuevo Leon, Mexico, aimed at reviewing some of the most recent advances made in the following five areas: Genes and Human Diseases; Cellular and Molecular Pathology; Infectious Diseases; Brain Transplants and the New Approaches and Techniques with Potential Application to Cell Function and Disease. This book is based on the contributed papers of the symposium. To underline the importance of the clinical approach to the study of cell function and disease a section on this subject was added at the end of the book. The chapters in this volume include contributions by some of the leading scientists of the international scientific community and Mexico. During the course of this international conference, numerous discussions were held by the local and international representatives of the scientific community concerning the creation of an International Center of Molecular Medicine aimed at stimulating further interaction between molecular biologists, biochemists, biophysicists and clinicians. Such ideas received the endorsement and support of the Director General of the united Nations Educational and Scientific Organization (UNESCO), Federico Mayor, the Governor of the State of Nuevo Leon, Jorge Trevino, and the Secretary of Health of Mexico, Guillermo Soberon.

Learn how to maintain a quality collection within a budget and still manage to make necessary cuts and savings. As the purchasing power of the materials budget declines, effectively managing the allocation of the materials budget and the development of the collections becomes more and more of a challenge. In The Acquisitions Budget, practicing acquisitions librarians--representing almost all types and sizes of libraries--address their daily problems and share innovative and effective methods for dealing with a shrinking budget. These authoritative contributors, who have many years of practical problems solving experience, also offer useful tips on how to influence administrators, faculty, students--anyone who has even partial control over allocating the budget. With this valuable new book, you will also enhance your knowledge of how the latest technology saves time and expenses in working out the acquisitions budget from day to day. Specific information is given on online and CD-ROM weapons in the war with the budget process.

Concise History of Western Music combines Grout and Palisca's uncompromising reliability, scope, and respect for the narrative, while offering many more pedagogical aids, such as chapter preludes and postludes; "Études," excursions that explore the material more deeply than the main text; and "Windows," boxed discussions of special topics.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

A Seminar in the CEC Agricultural Research Programme, held in Dublin, Ireland, November 21-22, 1985. Sponsored by the Commission of the European Communities, Directorate-General for Agriculture, Division for the Coordination of Agricultural Research

La Bayadère was first produced at the Maryinsky Theatre, St Petersburg, on 4 February 1877. The scenario was by Sergei Khudekov and Marius Petipa, who also devised the choreography. The music was by the Austrian composer Ludwig Minkus (1827-1917), who spend most of his life working for the Imperial Ballet in St Petersburg. His music for this ballet long scorned, never published, and endlessly re-arranged: has slowly emerged, since its revival began in the West in the 1960s, as a viable and significant musical achievement in its own right. Apart from the strongly defined melodies, infectious rhythm, and affecting harmonies, there is a powerful unity of conception and a sustained attention to mood that establishes its own unique incidental atmosphere. In its evocation of far-off times, the score conjures up an exotic Indian setting, where two spheres are set in contrast:a bright external world of colour and pomp, of ambition, rivalry and death; and an internal realm of night and dreams, of ideals, transcendent love and life/all realized most completely in the famous Kingdom of the Shades in act 3. The generous self-offering love of the temple dancer Nikia is one of the great stories of the Romantic ballet. Here for the first time is the piano score of the entire ballet. The music derives from four sources: a clear manuscript from the days of the Soviet Union; a version of Act 4 as held in the Library of Covent Garden; a beautiful Russian copy of the Kingdom of the Shades; and a potpourri from the 1880s by Johann Resch:the only music ever published from the score.
