The world ' s fresh water supplies are dwindling rapidly—even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages. Aquananotechnology: Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods. The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al13 clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting. With contributions from experts in developed and developing countries, including those with severe contamination, such as China, India, and Pakistan, the book ' s content spans a wide range of the subject areas that fall under the aquananotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants—both geogenic and anthropogenic—keeping in mind that it is not enough for water to be potable, it must also be palatable.

"A ... look at the glittering world of turn-of-the-century Paris through the first in-depth study of the three women Proust used to create his supreme fictional character, the Duchesse de Guermantes. Geneviève Halévy Bizet Straus; Laure de Sade, Comtesse de Adhâeaume de Chevignéâ; and âElisabeth de Riquet de Caraman-Chimay, the Comtesse Greffuhle--these were the three superstars of fin-de-siâecle Parisian high society who, as Caroline Weber says, 'transformed themselves, and were transformed by those around them, into living legends: paragons of elegance, nobility, and style.' All well but unhappily married, these women sought freedom and fulfillment by reinventing themselves, between the 1870s and 1890s, as icons. At their fabled salons, they inspired the creativity of several generations of writers, visual artists, composers, designers, and journalists ... Proust, as a twenty-year-old law student in 1892, would worship them from afar, and later meet them and create his celebrated composite character for The Remembrance of Things Past"--

Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers, hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers. The interactions among flow, turbulence, vegetation, macroinvertebrates and other organisms, as well as the transport and retention of particulate matter, have important consequences on the ecological health of rivers. Managing rivers in an ecologically friendly way is a major component of sustainable engineering design, maintenance and restoration of ecological habitats. To address these challenges, a major focus of River Flow 2016 was to highlight the latest advances in experimental, computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid-driven ecological processes, anthropogenic influences, sediment transport and morphodynamic processes. River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro-Environment Engineering and Research (IAHR). Since its first edition in 2002, the River Flow conference series has become the main international event focusing on river hydrodynamics, sediment transport, river engineering and restoration. Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter-disciplinary research involving, among others, ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability. River Flow 2016 (extended abstract book 854 pages + full paper CD-ROM 2436 pages) contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research, and will be of interest to academics interested in hydraulics, hydrology and environmental engineering.

Proust's involvement with fin-de-siècle 'hysteria', and its impact on the writing of his great novel.

Philosophy as Fiction seeks to account for the peculiar power of philosophical literature by taking as its case study the paradigmatic generic hybrid of the twentieth century, Marcel Proust's In Search of Lost Time. At once philosophical--in that it presents claims, and even deploys arguments concerning such traditionally philosophical issues as knowledge, self-deception, selfhood, love, friendship, and art--and literary, in that its situations are imaginary and its stylization inescapably prominent, Proust's novel presents us with a conundrum. How should it be read? Can the two discursive structures co--exist, or must philosophy inevitably undermine literature (by sapping the narrative of its vitality) and literature undermine philosophy (by placing its claims in the mouth of an often unreliable narrator)? In the case of Proust at least, the result is greater than the sum of its parts. Not only can a coherent, distinctive philosophical system be extracted from the Recherche, once the narrator's periodic waywardness is taken into account, not only does a powerfully original style pervade its every nook, overtly reinforcing some theories and covertly exemplifying others: but aspects of the philosophy also serve literary ends, contributing more to character than to conceptual framework. What is more, aspects of the aesthetics serve philosophical ends, enabling a reader to engage in an active manner with an alternative art of living. Unlike the "essay" Proust might have written, his novel grants us the opportunity to use it as a practice ground for cooperation among our faculties, for the careful sifting of memories, for the complex procedures involved in self-fashioning, and for the related art of self-deception. It is only because the narrator's insights do not always add up--a weakness, so long as one treats the novel as a straightforward treatise--that it can produce its training effect, a feature that turns out to be its ultimate strength.

This set comprises 40 volumes covering 19th and 20th century European and American authors. These volumes will be available as a complete set, mini boxed sets (by theme) or as individual volumes. This second set compliments the first 68 volume set of Critical Heritage published by Routledge in October 1995.

This volume sets Marcel Proust's masterwork, À la recherche du temps perdu (In Search of Lost Time, 1913–27), in its cultural and socio-historical contexts. Essays by the leading scholars in the field attend to Proust's biography, his huge correspondence, and the genesis and protracted evolution of his masterpiece. Light is cast on Proust's relation to thinkers and artists of his time, and to those of the great French and European traditions of which he is now so centrally a part. There is vivid exploration of Proust's reading; his attitudes towards contemporary social and political issues; his relation to journalism, religion, sexuality, science and travel, and how these figure in the Recherche. The volume closes with a comprehensive survey of Proust's critical reception, from reviews during his lifetime to the present day, including assessments of Proust in translation and the broader assimilation of his work into twentieth- and twenty-first-century culture.

Proust, Pastiche, and the Postmodern, or Why Style Matters argues against the traditional view that Marcel Proust wrote pastiches, that is, texts that imitate the style of another author, to master his literary predecessors while sharpening his writerly quill. On the contrary, James F. Austin demonstrates that Proust ' s oeuvre, and In Search of Lost Time in particular, deploy pastiche to other ends: Proust ' s pastiches, in fact, " do things with words " to create powerful real-world effects. His works are indeed performative acts that forge social relationships, redefine our ideas of literature, and even work against oppressive political and economic discourses. Building on the " speech-act " theory of J.L. Austin, Jacques Derrida, and J. Hillis Miller, and on the postmodern theory of Fredric Jameson, this book not only elucidates the performative nature of pastiche, but also shows that the famous " Goncourt " pastiche from In Search of Lost Time has attracted so much attention because it already attained the postmodern, that is, it eliminated temporal depth and experience, transforming time itself into a nostalgic style of an era, and into the sort of aestheticized surface that came to define postmodernism decades later. To reflect this transformation of pastiche, this work rearticulates its history in France around Proust. Reconfiguring a scholastic, classically-inspired pedagogical tradition based on imitation, and breaking with the dominant satirical practice, Proust ' s work opened up possibilities in the twentieth century for a new kind of pastiche: playful and performative in the literary field, and postmodern in a French cinema that, as with the Goncourt pastiche, represents time as the visual style of an era, whether unreflexively in " heritage " films such as Régis Wargnier ' s Indochine, or discerningly in Eric Rohmer ' s Lady and the Duke, which uses period pictorial and painterly conventions to illustrate how the representation of history onscreen typically flattens time into style.

The first textbook to focus on the history of lived Shi'ism in South Asia Everyday Shi'ism in South Asia is an introduction to the everyday life and cultural memory of Shi ' i women and men, focusing on the religious worlds of both individuals and communities at particular historical moments and places in the Indian subcontinent. Author Karen Ruffie draws upon an array primary sources, images, and ethnographic data to present topical case studies offering broad snapshots Shi'i life as well as microscopic analyses of ritual practices, material objects, architectural and artistic forms, and more. Focusing exclusively on South Asian Shi'ism, an area mostly ignored by contemporary scholars who focus on the Arab lands of Iran and Iraq, the author shifts readers' analytical focus from the center of Islam to its periphery. Ruffie provides new perspectives on the diverse ways that the Shi'a intersect with not only South Asian religious culture and history, but also the wider Islamic humanistic tradition. Written for an academic audience, yet accessible to general readers, this unique resource: Explores Shi ' i religious practice and the relationship between religious normativity and everyday religious life and material culture Contextualizes Muharam rituals, public performances, festivals, vow-making, and material objects and practices of South Asian Shi'a Draws from author's studies and fieldwork throughout India and Pakistan, featuring numerous color photographs Places Shi'i religious symbols, cultural values, and social systems in historical context Includes an extended survey of scholarship on South Asian Shi ' ism from the seventeenth century to the present Everyday Shi'ism in South Asia is an important resource for scholars and students in disciplines including Islamic studies, South Asian studies, religious studies, anthropology, art history, material culture studies, history, and gender studies, and for English-speaking members of South Asian Shi'i communities.
